

Introducing the

# Symetra Preferred Cancer Program

With over 14 million people receiving a diagnosis each year, cancer is one of the world's most pressing health challenges.<sup>1</sup> Many of those people who need life insurance don't qualify for affordable coverage because of their diagnosis. At Symetra Life Insurance Company, we're hoping to change that.

Thanks to progress in cancer research, people today are living longer than ever before—many in full remission. We believe they deserve a second look when it comes to qualifying for life insurance. That's why we are pleased to introduce our **Symetra Preferred Cancer Program**, available Sept. 13, 2018!

## What is the Symetra Preferred Cancer Program?

The Symetra Preferred Cancer Program is an underwriting program designed to offer clients who've been diagnosed with one of seven qualifying cancers up to a "Preferred" underwriting rate, allowing them to receive more affordable life insurance coverage.

The program allows those with single in-situ level (non-invasive or low grade) cancer histories to possibly move from what might have been a Standard rate to a Preferred or Standard Plus rate class.

## How does it work?

During the normal underwriting process, the Symetra underwriter will gather all necessary medical information on the client and their cancer history. This may include obtaining medical records to establish details on the type of treatment they received, when they completed it or whether follow-up care has occurred. After the information is gathered, the underwriter will determine if the client qualifies for the Symetra Preferred Cancer Program.
